

THE WATER AGENCY

Putting People At The Heart Of International Water Projects

EDUCATION

COMMUNICATION

KNOWLEDGE

BUSINESS

The Water Agency believes that inspiring leaders and bringing different people together is a key ingredient for solving water challenges.

ASIA WATER ACADEMY

Asia Water Academy is an online water, environment and climate education platform for professionals in Asia and beyond who seek to improve their skills and knowledge through interdisciplinary and practice-oriented courses, all at their own pace.

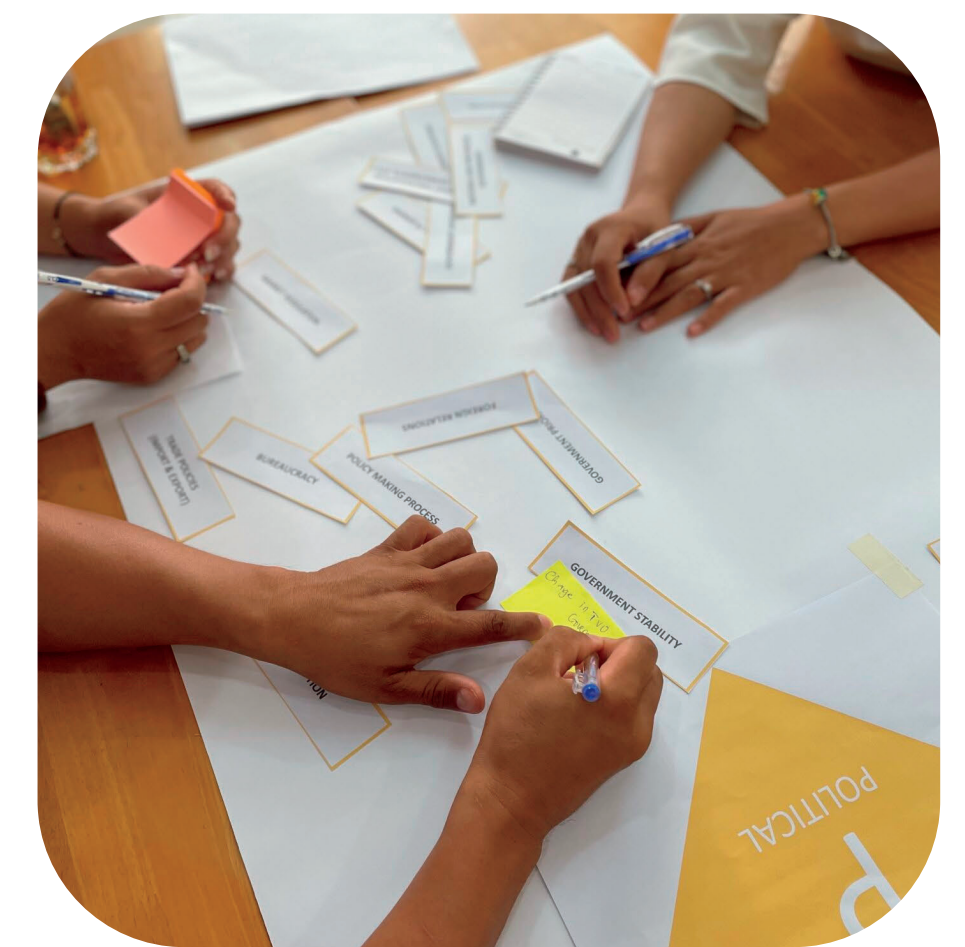

ASIA WATER CHALLENGE

Asia Water Challenge is a capacity-building program that challenges and inspires the next generation, especially students and young professionals from various backgrounds, to contribute ideas and concepts for their version of solutions in sustainable water management.

ASIA CLIMATE LAB

Asia Climate Lab is an online workspace for people and organisations working on climate adaptation programs and projects in Asia.

ASIA RAINCRAFT

The Asia Raincraft program empowers urban communities across Asia to have a real impact in addressing water and climate challenges in their own living environment by utilizing Minecraft video game as a collaborative tool.

ASIA WATER HOUSE

Asia Water House assists international and local organizations by supporting on-the-ground activities and stakeholder engagement, setting up an enabling environment, and building a sense of belonging for the community and local stakeholders.

ASIA VALUING WATER

Asia Valuing Water is a training and consultancy program for mid-level professionals from all business sectors to help them in making better decisions to face water risks.

ASIA WATER PORTAL

The Asia Water Portal is the digital gateway that connects local and international water professionals and enables them to discover, share, learn and collaborate.
